

# VexIQ Robotics

## at Brownsburg East Middle School

*Sponsored in part by*  **CSO**  
ARCHITECTURE · INTERIOR DESIGN

**Students impacted: 50+ | Subject: Robotics Club**

This funding is of high importance due to the fact that the Robotics Teams cannot play the game or compete in this year's challenge if they do not have all the necessary VexIQ parts. EMS has 50-100 students who have expressed interest or who have already applied to be in robotics. This grant purchased updated robotics equipment that allows the students to compete in multiple tournaments. The club will be able to offer a unique, innovative, and hands-on experience that students may never have the opportunity to do otherwise. Robotics are also used in SEEK to spark interest for other kids who may have never considered joining robotics. Robotics allows students the opportunity to find their niche, collaborate, problem solve and think critically as they work together to complete tasks together.
