

# Coding Robotics Kits

## at Brownsburg East Middle School

*Sponsored in part by*

**Students impacted: 100+ | Subject: Science**

With this grant, more students at the middle school level are able to participate in the unique opportunity to develop computer science and engineering skills through the construction and coding of robots that can perform a variety of tasks. Materials purchased ensure that there are enough supplies at every skill level to meet the needs of students in the robotics program. This grant allows more students to have hands-on learning experiences that will spark their passion for engineering and coding and will help them develop their problem-solving skills. This will also provide a pathway for students to be more prepared and ready to share their skills at the high school level with that robotics team.
